phanchauhoang2004@gmail.com ⋄ github.com/h0angpc ⋄ linkedin.com/in/h0angpc

PROFESSIONAL SUMMARY

Mobile Developer with hands-on experience building and deploying production Flutter applications to App Store and Google Play. Experienced in state management (Bloc), REST API integration, Firebase services, and Bluetooth device integration. Passionate about scalable architecture and performance optimization.

EDUCATION

University of Information Technology - VNUHCM Sept 2022 – Expected June 2026
Ho Chi Minh, Viet Nam

- B.S. in Software Engineering – **GPA**: 8.8/10.0
- TOEIC 4-Skills: L&R 850/990 — S 120/200 — W 160/200

Nguyen Binh Khiem High School for the Gifted July 2019 - June 2022
Quang Nam, Viet Nam

TECHNICAL SKILLS

- **Programming Languages:** Dart, C#, TypeScript, Java
- **Mobile Development:** Flutter, Java Android (XML), Android SDK, Firebase (Auth, FCM), App Store & Google Play Deployment
- **Web Development:** NextJS, NestJS, NodeJS, ExpressJS, Entity Framework, RESTful APIs
- **Databases:** SQL Server, PostgreSQL, MongoDB
- **Tools:** Git/GitLab, VS Code, Visual Studio, Android Studio, Xcode
- **Concepts:** OOP, Data Structures & Algorithms, Clean Architecture
- **Soft Skills:** Teamwork, Problem-solving, Self-learning, Communication

EXPERIENCE

Software Engineer Feb 2025 – Present
AI Power *Ho Chi Minh City, Vietnam*

- **Phu My Loyalty (Flutter Mobile App)** — *Mobile Developer* Feb 2025 – Present
  Available on: App Store — Google Play
  - Developed and maintained a production Flutter application deployed on App Store and Google Play, serving 5,000+ active users.
  - Built core loyalty features (authentication, point tracking, reward redemption, transaction history).
  - Applied Clean Architecture with repository pattern and Bloc state management, integrating RESTful APIs, FCM (push notifications), and local storage.
  - Delivered Phase 2 features including event check-in, in-app chatbot, gamification (Lucky Wheel), and Bluetooth integration with Enfarm devices.
- **Prepress EV (WPF Desktop Application)** — *Desktop Application Developer* Jun 2025 – Aug 2025
  - Developed features using WPF and C# to validate product tags from PDF against Excel data.
  - Automated PDF-to-Excel comparison, improving accuracy and reducing manual errors.
  - Implemented printsheet generation to streamline workflow and reduce processing time.

PROJECTS

- **Eduhub - Online Course System** | ReactJS, NodeJS, Flutter — Aug 2024 - Dec 2024
  - Role: Mobile Developer – built and optimized the Flutter app for course browsing, enrollment, and progress tracking.
  - Focused on performance optimization and consistent cross-device UI.
- **Hachiko Coffee** | Java, Firebase, Android, Android Studio — Feb 2024 - June 2024
  - Role: Mobile Developer – developed an Android e-commerce app for beverage ordering and delivery.
  - Improved ordering workflow, increasing user engagement by 15%.
- **Cleaning Service** | NextJS, Docker, Prisma, TypeScript — Aug 2024 - Jan 2025
  - Role: Frontend Developer – built the web interface for a service booking platform; also supported API development.
- **Management Spa - Zenith** | WPF, C#, SQL Server — Nov 2023 - Jan 2024
  - Role: Desktop Application Developer – developed a spa management system using MVVM architecture.
