PROJECTS

- **Cleaning Service** ↗ | NextJS, Docker, Prisma, Typescript, Stripe   Aug 2024 - Current
  - The **Cleaning Service** application connects service hirers and domestic workers. The system, with user-friendly interface and database integration, enables administrators to manage collaborators and track performance.

- **Eduhub - Online Course System** ↗ | ReactJS, Nodejs, Flutter   Aug 2024 - Current
  - **EduHub.io.vn** is a comprehensive online learning platform designed to provide engaging and accessible courses for students and professionals alike. With a focus on user-friendly design, EduHub.io.vn allows learners to explore various topics, enroll in courses, and track their progress in a seamless way.
  - **Main Role:** Mobile developer, focusing on building and optimizing the Flutter app for EduHub, ensuring high performance, seamless user experience, and consistent design across devices.

- **Hachiko Coffee** ↗ | Java, Firebase, Android Application   Feb 2024 - June 2024
  - Developed an Android e-commerce app for beverage ordering and delivery.
  - Streamlined the ordering process, resulting in a 15% increase in user engagement.

- **Management Spa - Zenith** ↗ | WPF, C#, Entity Framework, SQL Server, MVVM   Nov 2023 - Jan 2024
  - Created a stable and user-friendly management spa application.
  - Improved manging efficiency by minimizing errors and streamlining the process.
